Define Problem Statements (Customer Problem Statement Template)

Create a problem statement to understand the customer's point of view to build customer-centric processes.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Self-employed applicant / Small business owner Rajesh Kumar.	Secure an automatic loan approval for my business property.	I have highly variable monthly income with no traditional salary slips.	Traditional banks take weeks to manually audit self-employed papers.	Optimistic about loan eligibility but frustrated by processing delays.
PS-2	Credit Analyst Alla Umesh evaluating high-volume queues.	Verify eligibility statistics and spot high-risk applicants rapidly.	Manually assessing columns like credit score, debt levels is slow.	There is no integrated automated classification engine with risk flagging.	Stressed by high workload and worried about human error defaults.
