Empathy Map Canvas

Understand the customer/user from four perspectives - Says, Thinks, Does, and Feels.

SAYS	THINKS
- "I need a quick loan to buy inventory before the seasonal sale." - "Why is the bank taking two weeks to check a basic credit score?" - "Filing online is much easier than visiting branches."	- "Will they reject me because my income is variable?" - "Is it secure to upload my bank CSV reports online?" - "I hope my good credit score compensates for self-employment status."

PERSONA: Rajesh Kumar (Self-Employed Retailer, Age 34)

DOES	FEELS
- Fills loan parameter form fields. - Uploads business performance spreadsheets. - Checks status dashboard daily.	- Anxious about high debt-to-income rejects. - Relieved when instant approval triggers. - Confident due to clean dashboard guides.
