

Problem-Solution Fit Canvas

Date	06 July 2026	Project Name	Smart Lender
Team Lead	Alla Umesh	Team Members	DSP, JRJ, LPB, SVB

Problem-Solution Fit Canvas Details	
1. Customer Segment	Self-employed retailers, business owners, bank credit analysts, and loan applicants.
2. Problems & Pains	High approval turnaround times, lack of rejection feedback, manual processing overhead.
3. Triggers to Act	High business inventory cycles, quarter-end processing load on bank analysts.
4. Emotions Before/After	Anxious, blind to credit standards / Instant feedback, clear on triggered risk factors.
5. Available Solutions	Pros: Rigorous manual audits. Cons: Takes 2-4 weeks, high operational cost, zero applicant feedback.
6. Customer Limitations	No salary slips, variable monthly revenue, limited technical dashboard experience.
7. Behavior & Intensity	Constantly calls bank representatives, checks application status daily (High intensity).
8. Channels of Behavior	Online application forms, regional branches, physical document filing.
9. Problem Root Cause	Traditional manual verification processes are slow and prone to human errors.
10. Your Solution	Smart Lender: Web portal with XGBoost classifier, instant risk flags, batch CSV uploader.
